Point A in Fig. 1

Point A in Fig. 1

169617

It being the Bissextile, or Leap-year.

And the Seventh of our Deliverance from

In which is contained things fit for such a Work :

As the Diurnal Motion of the Planets, Remarkable
Conjunctions, Luxations, Eclipses, Meteorological, and
Astrological Observations. A Tide Table. The Rising
and Setting of the Sun. With a Judgment on the Four
Quarterly Ingresses of the Sun into the four Cardinal Signs.
And a Table of Houses, as formerly, according to the
Doctrine and Principles of the *Great Ptolemy*.

Calculated and referred to the Meridian of *London*.

Longitude { 24 } { 20 }
 Whole { 1 } { 1 } deg { 00 } { 00 } Minutes
 Latitude { 61 } { 32 }

Student in Physick and Astrology, at the Blue Ball in
Salisbury-street in the Strand, London.

*Frustra vos Astrales morbos sanare Cogitaturos, quamdiu stalla
morbosa dominentur. Ego enim potentia medico superior es.
Paracelsus de ente Astrorum.*

LONDON: Printed by R. Roberts for the Company of STATIONERS.

To the Honble English Reader

Reader

I have in this year, published several the first of which is

concerning the **To the most Ingenious** and learned

And true English Man, my Honoured Friend

THOMAS GARDINER, Esq;

Chyrurgion to His Majesty's Household.

JOHN PARTRIDGE

(As a Token of Gratitude for Favours received) candidly Dedicates these his Astro-

logical and Astronomical Recreations for

1696.

Wishing Health and Happiness

From my House at the Blom

Ball in Southwark in the

Street near the New Church

John Partridge

M. R.

To the Honest English Reader.

Reader,

I Have in this years Almanack inserted the Table of Houses according as I promised every other year; and perhaps I may now continue them ~~every year~~ for the assistance of those who know the use of them in Mativities and Questions also; for all those that practice according to the Doctrine that I have printed, can be no ways ready and exact without this Table, or one of the like nature to work by; and it is done in no Almanack but mine, and is the only Table demonstrable, as you will see in my Defectio Calendarum when printed.

We have been often told of an Ephemerides for 50 years. I understand there is one doing by Mr. M. near Aldgate, who they say is able to do what is promised, but his Name is not to be subjoined, but another who is not concern'd in the Work; if it be well-done, let the Author have the Honour of it; if it is ill-done, why should a Stranger own the Errors? I wish the Gentlemen that pretend to it, were able to perform the thing.

My Antiscorbutick Tincture may be had with printed Papers, shewing its Virtues and Use; of excellent Use in the Scurvey, Dropsy, Jaundice and Gravel, and divers other Cases, as may be seen in the Directions, being sold only by my self. Price of the Half-pint Bottle. 2 s. 6 d.

The Antiscorbutick Pills, I formerly mentioned, may also be had in Boxes, or otherwise, with Directions, shewing their Virtues in the Disorders and Obstructions of the Stomach and Bowels, giving ease in pains of the Head, Hypochondriack Melancholly, and Griets of the Bowels, they help loss of Appetite; they are taken in a small quantity, and work without Grieting.

The Pacifick Draught of excellent Use in all Pains of the Bowels attended with Fluxes, as Diarrheas, Dysentery, &c. nothing better in all Defluxations of Rheums, Colic, &c. each Ounce-glass, 1 s. containing three Doses; with several other things that I do here omit to mention. And also I give my Judgment on any Urine astrologically, or otherways, and am ready to assist any one that shall desire it of

From my House at the Blew-Ball in Salisbury-street in the Strand near the New Exchange.

John Partridge,
M. R.

On King William's passing the Boyne. The Introduction.

NOT the firm'd Agam, nor Pharsallan fight;
Nor of Philip's I intend to write;
Nor noble Brains, nor th' old Roman State;
Nor treach'rous Caesar's, nor poor Pompey's fate;
But of that Man, I sing, and his design,
Who first to fight, and bravely past the Boyne;
An Act more full, and far more nobly done,
Then Caesar's passing of the Rubicon.

At High-Lake Ship, the Hera wafted o're
 To Carrickfergus, th' Army there before;
 And when refrisht, impatient to be gone,
 To shew the English Courage with his own.
 The Morning came, Aurora's spreading Ray,
 Gave warning of the long expected day;
 The Horses pranc'd, the Men o'recome with Joy,
 The King marcht on, his Foes they sneaks away,
 And th' other side the Boyne securely lay.
 Thither did Teague and Dermot too resort,
 As num'rous as the Frogs in Pharaoh's Court.
 Up to the Boyne he came, his Musick play'd,
 And there the trembling Foes, and Streams survey'd.
 He thought a while; no tedious Council there,
 But speedy orders, bids his Men prepare.
 Cheer up brave Souls, said he; I bear the Fate
 Of England's Glory, Honour, Crown, and State.
 This Ditch shall never part us; shew ye're Men,
 Since they'll not come to us, we'll swim to them.
 This very thing will beat 'em; see the event;
 Come follow me; so in he bravely went:
 There England's Monarch on the Boyne did float,
 Himself the Pilot, 's Horse the Oars and 'Boats:
 All under Sail, but neither Mast nor Oar,
 Nor did they fear the Irish shot they bore,
 But still press on to the approaching Shore.
 Soon did they Land, and soon their Foes withdrew;
 And as they Landed so they Conquer'd too.
 The trembling Enemy afraid to stay,
 Turn'd Tail immediately, and bore away,
 And to King William's Glory left the day.
 Who made St. Patrick by this Action, Dumb:
 The Irish Camp, and their Commander run.
 Hail mighty Prince! here I'll Predict and Preach;
 Your Foes shall down to Future Ages reach.
 You'll need no Priest-craft Arts to spread your Fame;
 The Boyne it self shall celebrate your Name.
 His'try shall swell in giving you your due,
 And Warriors yet unborn shall tell it too.
 The pejur'd King shall you for Peace implore,
 And his own Sword shall our lost Fame restore.
 Nay drive the Coward's scandal from our Shore.

February hath XXIX Days.

Stillborn in Pifces doth Seditions move
Opposing Movers there soon after Jove
Now are the Sowers at work, Now busy too
And by base Projects their Designs pursue
The Pitches may go off, and oft return,
But certainly, at last comes broken home.

March, 1636.

When *Strasburg* did believe the *Tyrant's* Charming,
And laid their *Reason* down, as well as *Arms*,
He promis'd all that they did then adore,
As *Freedom*, *Laws*, and to each *particular* more,
But when his *Worship* was posses'd of both,
He did not keep one *Tithe* of his *Oath*.

April hath XXX Days.

No sooner is the joyful Spring begun,
 But four Saw-n lowers at the Sun
 This gives a cloudy Season, wet and cold;
 Great things in hand, and by great heads controll'd.
 The Soldier's brusk, and in's the reverend Gown,
 And the most Christian Turk begins to frown.

April, 1696.

Can we believe our modern *Tyrants* be
More just and kind, and less in love with Power
Or less addicted to base Cruelty,
Than those enormous Monsters heretofore?
No! they are still the same, the same you see,
Lewis the unjust, their cruel *Rothschilds*.

♌ is now become direct in Trine and Reception with the ☉. The Soldiers begin to move out of their Winter-quarters, and the sound of the Drum and Trumper begins to give notice that they have not forgot their Trade. Great Full ☉ 7 day, 2 min. past 11 before noon changes and removes among the Military Commanders, both by Land and Sea. Recruits and Supplies of fresh Troops, and new Councils and Resolutions are taken about the method to manage the Military Affairs. Remember at the Ingress Last Q. 14 day, 7 min. past 4 afternoon last past the ☽ was in 8 to the ☉ and ☽ and in a mundane Square to ♄; ☽ in the the Ascendant with Cor ☿ in 8 to ♄, &c. an angry Position, and France in a ruinous Condition to the comfort of the Jacobites.

New ☽ 21 day, 32 min. past 10 b. A noon The Square of ♄ and the ☉ shews difference among the great Men in divers Nations and Kingdoms, and that some eminent people shall yield to the Grave, having lingered long under disorders of Body. It shews also a discontented Party acting and contriving in private, intending it for others, but it proves their own destruction.

May hath XXXI Days.

These busy *Days* shew a brisk active Spring.
 And such like as vs as Drums and Trumpets bring.
 Some blustering work, for now the time draws near,
 When Mars's Song will in bright Steel appear.
Duelling, Ghosts, Inrosters, and what's more,
Tongue-trayers, Libellars, and knowe good store.

May, 1696.

Did the French Tyrant e're keep Word or Oath;
Or any Promise yet he ever made,
When 'twas his Interest to break 'em both,
And any Neighbouring Country so invade?
He's neither bound by Laws, nor Faith, nor Word,
'Tis Force must do, Force by the Gun and Sword.

Monthly Observations, with New and Full Moon, &c.

In this Month we have two Eclipses, one of the ☉, and the other of the ☾, whose Effects will shortly appear: for I believe that the Effects of Eclipses begin suddenly after their appearance, and not Full ☉ 6 day, 19 min. past 11 at Night. lie dormant 3 quarters of a Year, as some think. The Moon's is a great Eclipse, and will shew its Effects in Mutations and Death Eastward.

A busy Month and full of Action, between War and Peace, Embassies and private Messengers on one side, Orders for marching and sailing on the other; and some little Brush or Skirmish by Land.

On May 20 and 22, 1685, Dr. Oates was whip'd for scandalizing the Papists with matter of Truth in swearing the Popish Plot; they gave him more than 2250 Lashes with a Whip of 6 Thongs knotted, which comes to more than 13536 stripes, and this at the Entrance of Vopery, &c.

Look out sharp from the French Coast, and you will not lose your Labour, treasonable News and Letters comes in abundance. News from Flanders of some Action. Bad News from Sea by Stotm, &c.

June hath XXX Days.

Why should not fiery *Mars* in *Virgo* move
(In Square to *Venus* there, and join'd to *Jove*)
To some rash Action, hard to be withstood?
Some *Rival Love* perhaps may end in Blood.
But more than this, you may expect they'll do
Some publick Action and Destruction too.

June, 1696.

This is that mighty Prince, in Faith a Turk;
By Blood and breach of Oaths he spreads his Fame;
And for to carry on this pious Work,
What King he recommends shall do the same.
Think his beginning, that poor humble Guise
From whence this bloody Monster did arise.

Jupiter and Mars have been in ♂ on the French King's ☉, in □ to the Sun in the Twins; this is but poor Encouragement to his Friends in England, or his

Slaves in France. Why may not the ♂ of ♀ and ♀ set the Popish Zealots at work to make a Mutiny on 10th of June again? the same Aspect did it last Year.

This ♂ of ♂ and ♀ will produce some Violence, either by a private Murder, or some secret Design intended for that end: and I am of opinion his Turkish Majesty of France seems in danger of some such Attempt upon him, and the Position seems to shew it to be by a Priest, or a Woman, for ♀ is in □ to them both.

New ☾ 19 d. 52 m. p. 9 Morning.

This Month seems to be spent without much Action to the purpose on either side, toward the end we may hear of a Blockade or a Town besieged, which will prepare for some thing to the purpose at the beginning of the next Month. Meetings & Consults about the Publick Affairs, First quart. 27 d. 51 min. past Noon, but without any manner of Success; mighty murmuring and Complaints among all sorts of People in France.

July hath XXXI Days.

*Chronus creeps backward, slowly moving on,
And by that Motion doth confront the Sun.*

Let Princes have a care, a watchful Eye,

Some Traitors wait an opportunity ;

These never prate, act slyly in the dark,

The close-mouth'd Dog doth bite and seldom bark,

July, 1696.

A Tyrant that hath Courage bold and brave,
May be rever'd, and honour'd for the same;
But Coward Tyrants, such as steal and thieve,
All Men of Honour will abhor the Name.
How did he (but by these ways) *Flanders* gain?
How did he get *Burgundy*? how *Lorrain*?

At the Full Moon we find an ☿ of the
☉ and ☿ from Tropical Signs, this will

make a great bustle and noise, and give
occasion for much Talk and Discourse;
but what is done will be about the be-
ginning of the Month, and also about the
New Moon, at which times there will be
some Action, but the most remarkable

will be at the beginning. Rumours and
lying Reports spread abroad by the En-
emies of the King and Government.

At last there are some Terms agreed on
relating to Peace, and at the same time
a Town besieged and taken, or an Ar-
my beaten to their Hearts Content, &c.

We may probably about this time ex-
pect News from *Scotland*, and also from
some of the Northern Kingdoms and Do-
minions, and in particular from *Swedeland*
about some Advantage to that Crown;
but the contrary from *Denmark*, ☿ is re-
trograde in opposition to that King's MC.

Reports of some Action in *Hungary*, and
also something of the same nature in *Ger-
many*, perhaps against both the Infidels.

August hath XXXI Days.

Some talk of Peace, and others wish 'twere done,
 Some doubt it too, 'cause it goes slowly on;
 Nay! by the publick Actions and Affairs,
 You'd swear in earnest no such thing appears.
 Beetle-brow'd SATURN frowns in woful case,
 While active MARS affronts his Worship's Face.

August, 1696.

When *Corde* rais'd a Civil War in *France*,
The *Hugonots* preserv'd the Crown and Throne,
And did *Tyrannick Lewis* then advance
From Leading strings, to walk and go alone:
For this, pray what Rewards did he invent?
Nothing but *Hanging, Fails* and *Banishment*.

Monthly Observations, with the New and Full Moon, &c.

At the last Luration we may observe ♂ in the sixth going to the ☐ of ♄, and Full ☉ 3 d. 35 min. past 1 Morning, at the Full Moon ♄ in the seventh is ♂ to the Ascendent; this seems to shew an Autumnal Disease, from Excess in drinking unwholsome Liquors, and eating crude and unripe Fruits: And also fighting, or Lest quart. 9 d. 14 min. p. 7 at Night bombing a Town, perhaps taking it too.

As to the Affairs of the Publick, I do not expect any great matter it will do either of Good or Harm, because there is a kind of a Reception between the two Malevolents.

Much lying and deceitful Actions a New ☾ 17 d. 20 min. p. 3 Aftern. among Men, knavish Endeavours to disturb the Peace and Government. *Holland* is threatned with some Disappointment in her Trade, perhaps by Sea, &c.

Towards the Month's end there is a probability of some Action, but no precise Battel in any part I can discern; what is First quart. 25 d. at 4 in the Aftern. will be by Surprise, and so the whole Month will bear a Share in the matter, perhaps the bombing some Town, &c.

♄ Retrograde, the subtiler Statesman still unsuccessful; but ♂ in ♍ in * of ♄, makes the Souldier brisk, &c.

September hath XXX Days.

*Jove in the Sign of Justice with the Sun,
Stillborn and Venus in Conjunction;*

*Here seems a prospect for a Peace t'ensue,
And they that ask for it desire it too:*

*'Tis not from Man, 'tis God the thing must do;
If Heaven think it fit, then be it so.*

September, 1696.

In France they're Slaves, nor do they Freedom miss,
There Tyranny hath made it self a Law;
'Tis Treason there to call it what it is;
And by Tyrannick Force they're kept in awe.
Where Tyranny prevails, there soon ensues
Thin Jaws, obedient Slaves, and Wooden Shots.

Monthly Observations, with the New and Full Moon, &c.

Full ☉ first day, 29 min. past 9 Morn.

♂ is got into ☿, that Signum Justitiæ, as our Authors term it, and there is he accosted by ♀, ♀, and the ☉; this shews mighty Endeavours used for Peace, and these Positions do sute with that of the Ingress at hand, where the ☉ is in ♀ Last quart. 8 d. 51 min. past 4 Morn.

with ♀, and Δ to the MC: But in the Figure of the Ingress there is one Position that sours all, and that is the ☾ in ♈ in □ to ♂ in ♌. I guess by that both the Man and the Matter that hinders these Proceedings; I love Peace, and yet am not in haste for a bad one.

New ☾ 16 d. 53 min. past 7 Morn.

Endeavours used for a Cessation or Truce for a time, but I do not think it is to be obtain'd. ♀ is swift in motion, and mighty busy in his Place and Employment; first Letters and Literal Missives, then Agents, and Men of Power by peculiar Titles, &c. made capable to transact, First quart. 24 d. 42 min. p. 2 Morn.

The Gown-men receive Dignity and Honour, and have Preferments bestowed on them according to their Abilities, Some eminent Man suspected, and others taken and imprison'd for secret Crimes; Full ☉ 30 d. 55 min. p. 5 at Night.

5 Planets in the 12th House at New ☾.

October hath XXXI Days.

Saturn uneasy, knows not what to do,
 A Grumbling Tory, and a Plotter too;
 And were his Courage equal to his Rage,
 Might prove Cethegus to this present Age.
 But God be thanked (and indeed 'tis true)
 Their Art in Talking goes beyond their Do.

October, 1696.

A *Paris Parliament's* a Power decay'd,
 A *Lifeless Being* made to serve that *King*:
 The *Tyrant* says, Do this, I'll be obey'd:
 To work they go, none dares dispute the thing.
 If you would shew Oppression with Contempt,
 Express it by a *Paris Parliament*.

h is now become direct, and no sooner he is so but the ☿ meets him with a ☐ from ♋; such Aspects from Cardinal Signs make ruffling work among the great Men of Nations, and those entrusted in publick Business. This seems not only Last quart. 7 d. 22 min. p. 8 at Night. to countenance but confirm the Suspicions at the end of the last Month with something of Accusation and Proof, the Effects of which will not be determin'd, nor the Matter visibly known till the ☿ of h and ♋ in *December* next, and then I really think these things will be call'd in question, &c.

New ☾ 16 d. 2 min. past 1 Morn.
 Perhaps there might be some base knavish Contrivances among the pious Party about last *August*, carried on ever since, and now happily detected; and ten to one if there is not a certain Scotch Priest in it; for h is upon the place of his First quart. 23 d. 49 m. p. 11 at Noon. Radical Moon, and so will the ☿ of h and ♋ be in *December* next.

At the last New Moon all the Planets were under the Earth, things seem hush and quiet in the general. Some brisk *Martialis* receives Preferment as a Re-

Full ☉ 30 d. 30 min. p. 4 Morn.
 ward of his Merit and Valour.

November hath XXX Days.

The angry Stars decline that Quality,
And seem enclin'd to *Peace* and *Harmony*;
Wrongs are forgot, new Obligations move
To Acts of Kindness, Charity and Love.
Phosphorus meets with *Mars*, and mix their Light.
And lustful Flames with lustful Flames unite.

November, 1696.

Tyranny's sweet, while angry Stars forbear
To trample down the *Tyrant's* Will and Pride;
But when grim Fate doth with its Frowns appear,
Their greatest *Fau'rites* quickly *slip aside*.
This is the time when their true Friends are known;
But when that *Knowledge* comes, the *Power's* gone.

Monthly Observations, with the New and Full Moon, &c.

Things seem to be in a good peaceable posture at the beginning of this Month, and I hope tending to a good Issue and Conclusion. ♄ in * to the ☉ shews *DATE* 6 day, 9 min. p. 1 Noon.

some Clergy-man eminent for some remarkable thing, and if it deserves well he will not want a Reward, &c.

About the time of the Brumal Ingress we find some untoward Configurations, and they relate as well to the future as the present; it shews much bad Weather,

New ☾ 14 day, 32 min. p. 7 Morning, which at last ends in a rugged tedious Frost, and cold piercing Air. Hence also we may expect Murmurings and Discontents. News of Storms and Shipwracks from divers Parts, especially from the South and Western Parts of the World; and, First quart. 21 day, 3 min. p. 4 Morn.

contrary to our Authors Opinion, I judge Violence from this ☉ of ♄ and ♄, and by fighting or such like tending to Blood.

God bless his Majesty *K. William*, and send him a long and happy Reign, that he may give Laws to our Enemies, en-

Full ☉ 28 day, 30 min. p. 8 Morn. Enlarge his Dominions, and settle his Kingdoms in Peace, and let all the People say, *Amen*.

A short Chronology of Memorable Things for some Years past

Since the Martyr resign'd in a violent Strain,	47
And his three pious Sons were brought in again.	36
Since Charles the merciful came to the Crown,	36
Whose Vertues and Piety none can disown.	
Since Dunkirk was sold to our Brethren the French,	34
And paid for in Gold, Instructions and Wealth,	
Resolv'd to destroy us and ruin the Nation,	
And bring our Religion and Laws to their Fashion.	
Since the Plague, that destroy'd a vast number of Souls:	31
Since the City was burnt, and with it St. Paul's.	30
Since the Meetings were plagu'd and much Injury done,	28
That our Will might be known and Pop'ry go on.	
Since the cursed Informers, those Catchpoles of State,	
Were set up and maintain'd for the Devil knows what.	27
Since the damn'd Popish Plot, which some gravely deride,	18
And the Papists (by help of old Hodg) laid aside.	
Since Passive Obedience grew savishly hot,	16
And taught us new Doctrines that now are forgot.	
Since a mighty great Lord with Horn'd Bucks was sent down	14
To treat the Lewd Boys, and debauch the mad Town.	
Since the City was question'd, and so was their Power,	14
And the two Sheriffs of London were sent to the Tower.	14
Since Guild-Hall was manag'd, you n'ere saw the like,	
And Elections defended with Musket and Pike.	13
Since the Charters were seiz'd for Crimes yet unknown,	13
And Judges too made to do Justice thereon,	
By Court Quo Warranto's and damn'd Innuendo's,	
Our Lives and our Laws were like Paper Windows.	
Since the Faction set up, City Rights did invade,	
And all who oppos'd it were Rioters made.	13
Since Jessys sat Chief, and ought so to be;	13
Since the Popish Lords bail'd by Withins and he.	12
Since a certain Recorder in Court let 'em know } Dec. 11.	
That preaching and praying was riotous too. } 1683.	13
Since James the Just did arrive at the Throne,	
And endeavour'd to bring the two Churches to one.	9
Since Pop'ry commanded that all should obey,	8
And Passive Obedience kept out of the way.	
Since the Heads of the Faction unluckily fell on	7
Such ways as did lead these new Saints to Rebellion.

The Four Quarters of the Year Astrologically considered.

Patrique prosperitas Regi.

THe ☉ enters ♍, December the 11th, at 43 min. after Noon, at which time 10 deg. of ♍ culminates, and 15 deg. of ♍ ascends, and h in the Midheaven in ♍ to the ♀ in the fourth, and ♀ in ♍ in the Seventh, all the rest of the Seven Planets being in ascendent or succedent Houses. And at the full Moon preceeding this Ingress, the Figure was almost the same with this; the ☉ being in ☐ to ♄, and ♀ in ☐ to ♄, as here at the Ingress. I shall be short on my Judgment of this Quarter, and only speak to three things: The first is concerning War and Peace; this being the Season of the Year for Counsel and Design, and when things of that Nature are determined and agreed on. As to this, the ☐ of the ☉ and ♄, and the ♄ of the ♀ and h, considered with the ☐ of ♄ and ♀, give no hopes of Peace at present; but with these we must also remember that Eclips of the ♀ in November, 1695. just over, and whose Effects must be expected in this Winter quarter and forward, but with most vigour in this.

The principal Result of this Quarter seems to be for War and Confusion; and whatever Endeavour or Offers may be now made for Peace, will be of no esteem, nor judged worthy acceptance. And if I may speak my Opinion, I should judge by the ♄ of the ♀ and h, that a certain King in Europe is in great Distress, and that the Designs now intended and contrived are against him, and they will be executed rather by ruinous and destructive Ways and Methods than by fighting; for h is not a fighting Fellow, tho his Ruin is equal to that of ♄, but in another way: Hence I judge no Peace this Year.

The second is of general Affairs; h Angular at the Ingress, and the preventional Full ☉ shews a cold Season is like to ensue, and that the Winter quarter seems to be Cold and Violent. It shews some difference in the Councils and Affairs of *Holland*, and that there will be endeavours used to disturb the Reate and Government of *Scotland*; but the ☉ comes quickly to the Body of h, and he Lord of the Eighth from the Tenth, which shews severe Punishment, if not Death, of the Offenders and Mal-factors. Murmurings and Repinings among many, some for want of Trade, some for Losses and Misfortunes, and some because of the War; but alas, the last Sort do not consider. For now the Work is in a fair way of doing.

Had not we better endure the War a year or two, and humble the Oppressor, and make him incapable to play his Tyrannies and Villanies any more, than give it over now the Work is almost done, and give him by that means an opportunity to cheat us out of our Liberties, Laws, and Religion, and make us slaves into the bargain? think what you will of it, it must be either *K. William* or *K. Lewis*; therefore do not cheat your selves; if he baffles you now, he will get *England* by Promises and Claims, as he did *Flanders*. *France* in great Distress and Want, and that King under great Disorders and Distractions; his ☉ is now to the ☐ of the ♃ in ♌, and an ill Direction.

The third is about Health or Sickness in general; we shall find the Distempers of the Winter to be from ♄ and the ♃, *Coughs*, *Hoarseness*, *Asthma's*, and *bad Lungs*, and this by turns, accompanied with a feverishness, because the ☉ is in ☐ to ♄; heats and disorders of the Blood, with *Plurisies* and *Inflammations* of those Parts; but I cannot judge any general Sickness to the Destruction of Mankind this Quarter.

The *Spring-Quarter* begins when the ☉ enters the first scruple of the Sign ♈, and that is this Year, *March 9*: at 2 h. 59 min. 25 sec. after Noon, 7 deg. of ☉ culminating, and 21 deg. of ♌ ascending at that time.

In times of War, ☉ is to be considered in all Figures that do relate to Publick Affairs, as *Ingresses* and *Retires*, &c. and here we find him Stationary near the Regal Star, called, *The Lyon's Heart*, and just coming direct, in 8 to ♀, and in Aspect with none else but she; and the ♃ is in 8 both to ♀ and the ☉ going to the △ of ♀, but at a great distance. But that which is the most remarkable Position among them all, is the Benefick ♄ in △ to ♄, but Retrograde, and in ☿ his Detriment; and this Aspect, I know, is depended upon to do mighty things in order to a Peace. I do judge it will do some thing in order to it, but not effect it at present, because ♄ is too weak to do it, and ♄ too strong to be perswaded, frightened, or ruffled so it yet a while; yet this I will say, That there shall be a ground-work now laid, upon which bottom Peace will be at last established with some Amendments. But at present (which we are now to consider) we find ☉ strong, powerful, and furious, and rather enclined to make a new War than to end the old One; he is in a Sign of his own Nature, with a Star of his own Nature in an Angle, hastning to Direction, in opposition and parallel with ♀; and to add to all this,

and Honour, Unity to the Confederates, Happiness and Plenty to *England*, and a happy Issue of the War in pulling down Tyranny and Oppression, and giving Peace to *Europe*, be-
 trayed in the last thirty Years. *Amen.*

A Remarkable Nativity.

I have made choice of this Nativity, to shew there is something in the Genethiical Part of Astrology, than what is generally known to our Modern Professors and Pretenders. This Lady was a proper comely Woman, and also Healthy, having a strong *Hileg* and *Alobocoden*, and yet died before she was 17 years old compleat, *i. e.* on November 25, 1683. at 7 *Adams*, to the amazement perhaps of all that shall see it.

That she died on the ☉ to the ☐ of *h*, every Pretender will be apt to judge, and indeed I readily grant it; but how to make this comply with the time, is the only thing in dispute. The Ark of Direction is 15 deg. 3 min. which by *Nabod's* Measure gives 15 Years, and 98 Days, and falls short of the time of the Accident 1 Year, and 148 Days. And no man, I believe, will pretend to any other Direction than this of the ☐

of h to be the Cause of her Death, which shews the Measure of Time false. But if you take the true Measure, these 15 deg. 3 min. give 16 Years and 5 Months, which is near enough to the time of the Accident, which was a violent Fever, that kill'd her in five or six Days after it had seized her; and how our Ingenious Pretenders will make their measure agree with the time, I cannot imagine. But besides that stumbling-block, there will arise several Queries, as hard and difficult to resolve as that is, and perhaps more.

1. Why should her Life be so short, and the \odot *Hileg* in his Exaltation in the tenth House? 2. Why should the \odot to the \square of h have more power to kill, than the \odot to the Body of h , which she out-lived? 3. Why should the \odot to the \square of h give a Fever, seeing he is by Nature cold, and the Aspect fell in h , a cold earthy Sign? 4. And lastly, What can they say in defence of their *alcobocaden*? For in the Figure, that power must be placed either in the \odot or \square , and they both very strong, the mean years of the one is 40. and of the other 69. and I hope they will not pretend to the least Years of such strong Stars; if they do, they break their own Rules. And now for the Readers Information, I will answer all these Objections myself, being certain there are not many can do it beside, and at the same time allow them an equal power in other Nativities of the like Nature and Positions.

To the first, It is plain, that Life doth not wholly depend on the strength of the *Hileg*, but the *Apheta's* meeting the *Prophanatos*, and be the *Hileg* never so strong, there is no Rule against the latter. To the second, I say at the same time the \odot came to the Body of h , he came also to the Parallel of h in mundo within 2 degrees; and besides h was under the Sun beams. See *Ptolem. Lib. 3 Cap. 14*. To the third, It is plain, That one Star for the most part gives the Disease, and another gives Death; it is not the Sign, nor the Nature, nor the Aspect of h that gave the Fever, but the time only; it was the Beams of h gave the Fever by the help of the h in \triangle to him; and at that time she had by Direction, \odot ad \square h *Zod. ad parall. h mundo. ad parall. h mundo. ES ad h mundo*, besides two or three others of less note. To the fourth, I say it is a perfect Foolery, a *Chimera*, and of no use at all, except to laugh at. And so I leave the whole to the Consideration of those that are able and willing to take pains upon it, assuring them the estimate Time is very near truth.

B *Asseman's true Spirit of Scurvy-Grass, Plain and Golden,* so long famous for the Cure of the *Scurvy, Gout, Dropsy,* and several other Chronick Diseases, are still prepared by *John Hooker and Partner,* and are Sold by them at their House in *Paul's Chain* near *Doctor's-Commons.* Price 1 s. each Bottle.

The *Grand Balsamick Pill*, prepared chiefly for the Diseases of the Head and Stomach, made and sold only by *John Hooker*, at his House in *Paul's Chain*, sealed up in Tin-boxes Price 1 s. each Box.

William Boys, that famous *English Operator* in *Glas*, who lived lately in *Bell-Savage-Tard* on *Ludgate-hill*, is removed to the *Golden Griffin* in *St. John's Lane*, near *Clerkenwell*, where he makes all sorts of Artificial Eyes, exactly like the Natural, having the very motion too, and so exact, that they have been worn by several Persons many years, and not known to the nearest Relation, as hundreds can testify.

John Russell's Spirit of Scurvy-Grass, both *Plain and Purg- ing*, is the most strong piercing and powerful *Elixir of Scurvy-Grass* that is now sold. Those that buy it, may taste it, and if it is not, may return it without loss, being fit for the Closer of any Physician, and admirable in the *Scurvy, Dropsy, Gout*, and most other Diseases. And his *Lugenges* for *Coughs, Colds*, and *Consumptions*. With his *Worm-Powder*, that destroys all sorts of Worms. Sold at his House at the *Two Blow-Pests* against *Gray's Inn* in *Holbourn*, and in most Market Towns. Each sold for 1 Shilling.

John Mayor, Founder, that Casteth all sorts of Clock-work and Bells, and makes Flower-pots of hardened Metal, Liveth at the Sign of the *Five Bells* in *Old Bebbiehem*, alias *Bedlam Lond.*

Mr. Newton, Master of the Mathematical School at *Christ-Church Hospital, London*, hath just now published a Book of Navigation, the best hitherto extant. Sold by *Christ. Hussy* in *Little Britain*.

The Incomparable *Diaphoretick and Diuretick Pills*, working by Sweat and Urin, called *Matthew's Pill*, which have been, and are famous throughout the Kingdom for their extraordinary good Effects, in giving Ease, and curing the most painful and stubborn Diseases, are faithfully prepared and sold at the first House on the Right-hand in *Gunyard, Houndsditch*, near *Aldgate* in *London*, with a Paper of Directions.

Mr. Will. Kitchin, Junior, a Licensed Physician and Student in

in Astrology, gives notice of his Living and Residence in *South-street* in *Guildford* in *Surry*, where he practiseth both Astrology and Physick, and hath great success therein.

Elisir Stomachicum; or the great *Cordial Elisir* for the Stomack, to be drank at any time (but especially in the Morning) in any Liquor, as Tea, Ale, Canary, &c. which for the Scurvy to purify the Blood, expel Wind, for all Indispositions of the Stomach, as want of Appetite, &c. for Vapours in Women; and three other most certain Virtues mentioned in the Bills sold with it, excels any one Medicine ever made publick in the World; and of such Excellency and Usefulness for all Persons, as never to be without it about them. It is sold in most Cities, and many great Towns in England, by Mr. *Livingston*, Fruiterer at the *Royal Exchange*; at the Chief Coffee-houses in and about London; also by *M. Rhodes* at the *Star* in *Fleetstreet*, *H. Newman* in the *Poultry*, *S. Hawkins* in *George-yard*, *Lambardstreet*, Bookfellers; the three last selling it by Whole ale, and by Retail at 1 s. each Bottle.

Elisir Proprietas, being truly prepared, and to be had at the Author's House, at the Sign of the *Van Helmont* in *Heydon-yard* in the *Minories*, London. At Mr. *Tho. Horn's* at the *South Entrance* of the *Royal Exchange*. Mr. *S. Crouch* at the Corner of *Peck-head-Alley*, over against the *Royal Exchange* in *Cornhill*. Mr. *Bremster* at the *Crane* in *St. Paul's Church-yard*. Mr. *Gavel* at the *Paulikon* in *Westminster-Hall*. And Mr. *Cook* at the *Tobacco-Roll and Spar*, at the Corner of *Lincoln's Inn Fields* by *Turnstile*.

The Works of *F. Rabelais*, M. D. or the Lives, Heroick Deeds and Sayings of *Gargantua* and *Pantagruel*. Done out of *French* by Sir *Tho. Urehard*, Kt. and others. With a large Account of the Life and Works of the Author, particularly an Explanation of the most difficult Passages in them. Never before Publish'd in any Language. Printed for *Rich. Baldwin*, near the *Oxford Arms* in *Warwick-Lane*.

Compendium Anatomicum, novum methodo institutum, &c. or the Art of Anatomy displayed in a more compendious and regular Method than anything of this kind extant; and adapted not only for the use of all Students and Practitioners, whose immediate Business it is to converse with the said Art; but for all Gentlemen and others, who delight themselves with Contemplation of the Structure of their own Bodies, in 24s. By *John Case*, Professor of Physick, near *Ludgate*, London; and are to be sold by *N. Rolfe* at *Petty-Corner-Hall* on the North Side of *St. Paul's Church-yard*, and other Bookfellers, London.

this, in a Mundane Δ to δ . The Soldiers of all sorts begin to be brisk and bonny, and to talk of an early Campaign and Action betimes. *Demetrius* says, *Mars in Leone significat bella & contentiones.* *Mars in primo significat horribilitatem venturam hominibus*; and so we will leave δ , and see what he will do with us and the Enemy, being assured, in my Judgment, that he will play his part this year also according to his Ancient Nature and Quality.

In the next place, if we consider the γ , we shall find her in δ to the \odot and δ , and in a Mundane \square to h ; and h also in a Mundane \square to the \odot on the Cusp of the ninth Cadent; this shews some great Man, perhaps a King, in great Straits and Mischief, his Affairs are pestered with Inconveniencies, his People (*alias* Slaves) murmur, his Soldiers will in a short time begin to Desert, and his Kingdom subject to Insurrections and Broils; and tho I judge these to be the Effects proper to this Position and Aspect, yet I do not look on that Aspect as the Cause, but the Direction of the \odot to the \square of the γ that he now labours under. I will not say positively it shall kill him but to one in his Condition, I think it is sufficient to kill, the offensive smells that proceed from him being noisome not only to those about him, but to himself too; but the Direction will certainly embroil his Affairs, whatsoever it doth to his Body and Life; and this Aspect at the Ingress seems to shew those things will happen about this time. This δ of the \odot and γ falls in the exact \square to the last δ of h and δ last July, which will shew something of the Effects that are naturally the Effluvioms of that Opposition likewise.

But methinks the Eclips of the γ that happens the 6th of May at midnight, is very remarkable; it happens in the last decanate of m , and in the Midheaven in our Meridian, and both the Light in \square to δ at the same time. *Cardan* says Eclipses in the 10th and 4th are powerful, *Seg. 7. Ap. 81.* The same Author tells us, Eclipses of the γ give Drowth, which if so, we may expect a dry Summer. But *Proclus* says, *Rixis, Seditionibus, Cadibusque*; that it gives Contentions, Seditions, and Tumultuous Assemblies, with Slaughters and Destruction; &c. The place of the Eclips is m , the very Ascendant of the French King, and for that reason may probably affect his Dominions (for *Cardan* tells us, *Seg. v. Aph. 45.* that Eclipses have respect to the People, Kingdoms, Provinces, and Cities) and in particular those Parts towards *Savoy* and *Catalonia*; and

besides, it will affect divers Parts with the same Calamities, as well as *France*; and those are the North of *Africa*, *Poland*, *Russia*, *Turky*, some Parts of *Germany*, the *French* Conquests (or rather *Latrocinia*) in *Flanders* will feel it too, nor will *Ireland* be perfectly free; but for the Violence of it, I think *France* is most like to feel it.

The *Summer-Quarter* begins *June* the 10th, at 30 min. and 25 sec. past Three in the Afternoon, the ☉ then entering ♊. In the Scheme, 20 deg. of ♊ culminates, and 7 deg. of ♋ ascends; the Position is attended with Violence in every part of it. ♋ is in ☌ with ♌, and both of them in ☌ to the ♎, and ☐ to ♍; ♍ is in ☌ to ♈, and the ☉ is in Aspect with none good or bad. I shall not need say much upon this *Ingress*, because it seems to follow the Fate and Influence of the former, especially in Violence; and therefore we may expect the Months of *May*, *June*, *July*, and *August*, to be times of great Action, but especially the end of *May*, beginning of *June*, and *July*, and this both by Sea and Land.

I with the ☌ of ♋ and ♌ in ♎, in ☐ to the ☉, ♍, and ♎ in ♊, do not create some Heats and Animosities among the Citizens of *London*, about Priviledges, Power, and Offices.

Let it be observed that ♋ and ♌ are in ☌ on the Radical Place of the *French* King's ☉, and the ♎ in ☌, going to the ☌ of both; such Positions do usually give Disorders, Vexations, and Disappointments; and I really judge, he will find it true at this time; and in any Country but *France* would give Murders and Rebellion, but there the Peoples Reason is fettered as well as their Hards; and being born Slaves, are content to remain so without the desire of Liberty.

The *Autumnal-Quarter* begins *September* the 12th, at 8 min. past Five in the Morning, at which time 21 deg. of ♋ ascends in the East, and 18 deg. is on the M.C.

The two principal and most considerable Positions in the Scheme, are the ☉ in ☌ with ♋, ♌, and ♎ in ♊, the Sign of Justice. And the ♎ in ☌ in ☐ to ☌ in ♋, in fixed Signs; To each of which, I shall speak distinctly, and first of the ☉ and ♋. *So*. Here we find these four Planets, ☉, ♋, ♌, and ♎, all in the Ascendant disposed of thereby ♌, and all in ☌ to the ♎ on the place of the ☌ of ♈ and ♋ in ♋, *An. 1682*. About such a Conjunction our Authors make such a Confusion, that no Man is able to understand what they mean. *Haly* tells us, That a ☌ of ♋, ♌, and ♎, shews great Wars,

Want, and a Store of things eatable; but what reason he hath for it, or we to believe him, I know not; and therefore take the liberty to be a Dissenter; for I do not love any tyrannical Imposition contrary to Law, Reason, or true Religion. Well then! I take this Conjunction thus, The ☉ with ♃ and ♀ in ♌, seems to indicate a great and eminent Meeting of Councillors and great Men, to consult and concert Affairs of an eminent Import; and as they are all free from the maledick Beams of the Influences, and in ♌ the House of ♀; so I judge it to be about Peace, and what concerns the good of Mankind in general; and that it is about Peace, I am further assur'd by the presence of ♀, who hath been in ☉ with the ☉, ♃, and ♀, and is Lord of the first and tenth Houses. ♃ in the Ascendant, says Bonatus, *Serqubunt fidem & Religionem*, &c. This is a good hearing, but I doubt it was not writ for the Elevation of *Versailles* if he (Monsieur I mean) should keep Faith with any one this Year, it is the first time he ever did it with any man, his Brother *Duke* excepted. The ☉ in the Ascendant promiseth good both to Kings and their Subjects, but I doubt not to all; ask *France* the question.

The second remarkable Position at this *ingress*, is the ☐ of the ♃ and ♀ from ♌ and ♍; fixed Signs; this shews much Violence is like to be used and done in private, or by stealth, as Robberies, Murders, private Contrivances against Publick States, Princes and Governors. It shews the design of some in Clipping, Coining, and other cheating Tricks by Metal and Coin. Nay! perhaps *Sign-makers* may be more impudent too about this time in that Cheat and Villany. *Sign-makers* are a Crew of rascally Fellows about the Town, that pretend to give a piece of Metal (say! some do it on the back of a Card) with Figures, Characters, and unintelligible Words thereon, that they do not understand (for some of them cannot write a Line of true *English*) and this is to make them fortunate in Love, safe in Wars, prosperous in Sailing, &c. when at the same time they would be Beggars themselves, if it were not for this way of Cheating. And this brings to my mind what a Friend told me not long since, That a Gentlewoman came to him one day half distracted; he asked her the reason of her disorder; she said, there was a Gentleman that she loved well, and she was afraid he would marry another Woman; so she went to one near *Holborn* to be advis'd in the matter; he did

did assure her he could by his Art hinder him marrying any one else, and keep him wholly to her; for which he demand- ed six Guineas, so he gave her a *Sign* to wear next her Skin, and a Charm (*alias* Chear) with it: And yet for all this, the Gentleman married the other Lady. The *Signmonger* was de- ceived, and the Lady cheated of her Love and Gold. So my Friend advised her to *present* him for a *Cheat*, or else make him return her Money: *And so do I advise all these that are cheated by them, as all are that deal with them.* And to say the truth of them, they are ignorant, and know nothing of the Hea- ven, and therefore make their Compliment to Hell, accord- ing to the Poet, *Fleſſere ſe nequos ſuperos Acheronta Movebo.*

Since those above, I can by no means woo,
I'll tack about, and try what Hell will do.

Of the Eclipses for the Year 1696.

THere will be five Eclipses this Year; three of the ☉, and two of the ☾: and those of the ☾ almost Central, and also visible in our Meridian; but those of the ☉ invisible.

The first is of the ☾ on *May* the 6th, a little before Mid- night, in 27 deg. of M, that pious virtuous Sign. It will be total with Continuance, and also remarkable in its Effects, be- cause it happens in the tenth House of Heaven, and in the *French King's* Ascendant. It shews disorders to Kings, destru- ctions to Cities, Towns, and the Common People, and a de- cay of all Creatures living on the Water.

The 2d is of the ☉ on *May* the 20th, half an hour past 9 of the Clock at Night. It is a small Eclipse, and invisible in *Europe*.

The 3d is also of the ☉ on *October* the 16th, at 2 in the Morning, and is both small and invisible.

The 4th is of the ☾, *October* the 30th, half an hour past 4 in the Morning; it falls in the 18 deg. of T, and the 8th House of Heaven. It will be almost as great as any Eclipse can be of the ☾, because it happens within 30 min. of the *North Node*, and the ☾'s Latitude at the end of the Eclipse not 3 min. It will be visible at *London* if the Air be clear, and the Observer willing. It shews Violence, Death to great Persons, especially Women, Barrenness to the Country-man's Land, and Destru- ction to the Common Sort in divers Countries.

The 5th is of the ☉, *November* the 4th, at 5 of the Clock at Night; it will be a small one and invisible. And so much for the Eclipses, and the general Judgment on the whole Year also. Wishing His Majesty, King *William* long Life, Success,
